

## Year 1/2 By the Sea A

### Key Vocabulary

Conductor		The leader of a musical group for example: an orchestra
Instruments		Different objects that make different musical sounds.
Seaside		The seaside is any place next to an ocean. There are usually sandy or rocky beaches to play on
Sounds		Something that we hear

### Musical elements

Pitch	How high or low the sound is
-------	------------------------------

### Core Knowledge

#### Playing instruments together

Playing instruments is fun! They make different sounds and there are a lot of different types of instruments too. When we all play instruments together, we need to follow a leader so that we know how fast and how loud our instrument should be. The leader is called a conductor and they point at each group when it is their turn to play.

The conductor also uses other signals to show:

To play louder

to play quieter

to play faster

### Key Musical features

#### Seaside Sounds

Writing down the sounds you will make in order is an important part of making our own music. It means that each time the music is played, it will sound the same. These symbols in order represent different sounds that we might include in our seaside music
